

# The Toothfairy Show

The Toothfairy Show is a Children's Nutritional Education Program, already delivered to thousands of children from 2-7yrs of age. Our mission is to provide a gentle, accessible introduction to oral health and the world of dentistry, alleviating fear by bridging the gap between the child and the dentist.

The Toothfairy Show has been specifically designed to align with the National Quality Framework. This excellent Program delivers the following educational goals to offer a solid foundation for ongoing dental health awareness:

**Dental/Oral Hygiene** To reduce decay and gum disease in children.

**Healthy Eating** For healthy teeth and bodies

**Nutritional Awareness** Encouraging optimal nutrition, reducing obesity. Making good food choices

**Personal Hygiene** The importance of toothbrushing and hand washing.

Through song, dance, puppetry, stories and fun engaging interaction, the Toothfairy enlightens children with lessons that will stay with them forever. The children's imagination is captured with an enchanting delivery of a simple, yet vitally important message. Song and dance are used to enhance the sensori-motor experience, and facilitate engagement in the program. Children can have hands on experience with puppets and healthy eating games, then join in with the story and closing "fairy wish" song. Participants are given the opportunity to ask questions, developing their interest and reinforcing their newly learned skills.

The Toothfairy Show follows the following content of the National Quality Framework:

Standard 1.2 - Elements 1.2.2, 1.2.3

Standard 2.1 - Elements 2.1.1, 2.1.3, 2.2, 2.2.1

Standard 6.2 - Elements 6.2.2, 6.3.1, 6.3.4

Your centre is supplied with tools to help you to prepare for the Toothfairy's visit, including charts, activities, information for parents and staff.
